

# Colt Accurized Rifle

## COLT ACCURIZED™ RIFLE

While the Colt name is virtually synonymous with handguns, Sam Colt's initial revolvers off the assembly line were longarms. That's right! The first production model of any Colt was the No.1 Ring Lever Rifle.

The carbine breech (attachable shoulder stocks for handguns) and America's first slide action rifle were also part of Colt's on-and-off ventures into longarms.

Then in 1963 the AR-15® and M16 .223 (5.56mm) automatic rifles "made Colt's the small-arms sensation of modern warfare".

Their unmatched accuracy, performance and durability are available in their direct descendent, the Colt semiautomatic-only, sporting rifles. They're ideal for hunting, plinking and competition shooting.

### MODEL NAME FINISH ACTION

CR6724  
Colt Accurized Rifle  
Matte black with stainless steel barrel  
- Semi Auto

### CALIBER CAPACITY

- Gas operated  
- Multi-lug rotary locking bolt  
.223 Rem

### BARREL LENGTH

9 Rounds

### RIFLING TWIST

24"

### RIFLING GROOVES

RH. 1 Turn in 9"

### TRIGGER
